

Friday Seminars 2012/3 (autumn & winter)

**Institute for Genetics, Zùlpicher Str. 47 a,
Lecture hall, 4th floor, 12.15 p. m.**

- September 21 Stefan Höning, Institute of Biochemistry I, Medical Faculty, University of Cologne
News on clathrin-mediated endocytosis
- September 28 Jane Parker, Max Planck Institute for Plant Breeding Research, Cologne
Plant innate immunity pathway dynamics
- October 12 Maria Leptin, Institute for Genetics, University of Cologne
A family of innate immune response genes in the zebrafish
- October 19 Adam Antebi, Max Planck Institute for Biology of Ageing, Cologne
Pathways regulating *C. elegans* developmental timing and longevity
- October 26 Niels Gehring, Institute for Genetics, University of Cologne
The exon junction complex (re)loaded
- November 9 Jonathan Howard, Institute for Genetics, University of Cologne
Genetic control of a parasitic disease
- November 16 Björn Schumacher, Institute for Genetics, University of Cologne
DNA damage responses in aging and development
- November 23 Martin Hasselmann, Institute for Genetics, University of Cologne
Natural variation and molecular innovation in the honey bee *Apis mellifera*
- November 30 Thorsten Hoppe, Institute for Genetics, University of Cologne
Protein degradation in muscle development and disease
- December 14 Thomas Langer, Institute for Genetics, University of Cologne
Mitochondrial membrane scaffolds and phospholipid trafficking

cancelled:

- ~~December 14 Seth Davis, Max Planck Institute for Plant Breeding Research, Cologne
Metabolism and stress: to and from the circadian clock~~
